ASSISTANCE DOG MAP

Some of the animals can get spooked when they see a dog - even one as well trained as an assistance dog, so we ask you use this map as a guide. If you are unsure of any of the areas highlighted on the map, please speak to one of our team members who will be happy to assist you.

KEY:

We politely request pathways highlighted in orange are avoided as they lead directly past animals that become distressed when they see a dog.

We also ask that you not enter any of the animal houses circled in orange
