NOCTURNAL CREATURES

Glossary of key words

Adaptation

A way an animal's body helps it to survive or live, in its environment.

Diurnal

Diurnal organisms are those that are active during the day.

Echolocation

A technique used by bats, dolphins and other animals to determine the location of objects using reflected sound.

Habitat

The home or environment of an animal or plant.

Nocturnal

Nocturnal organisms are those that are active during the night.

Organism

A living thing; plant or animal.

Predator

An animal that hunts and eats other animals.

Prey

An animal that is hunted and killed by another for food.
