**WILD FLOWERS**  
Look out for spring flowers on woodland walks, record what you see!

**PAINTED LADY BUTTERFLIES**  
Look out for caterpillars feeding on thistles.

**HEDGEHOGS**  
Make a log pile, bug hotel or compost heap to help them find enough food. Make sure they can move around easily by making a hedgehog monorail and watch out for them crossing roads!

**HEDGEHOGS**  
Eating lots before hibernation! Make sure you have enough places for them to find bugs, slugs, worms and other yummy food.

**HEDGEHOGS**  
Build your bonfire from scratch! There might be wildlife hiding inside.

**TOADS**  
Look out for toads crossing roads.

**BATS**  
Begin to emerge from hibernation. Look out for them feeding on moths and other insects at dusk and dawn. Put a bat box up to give them somewhere safe to sleep in the daytime.

**PAINTED LADY BUTTERFLY**  
Start arriving in the UK. Look out for them and record when and where you see them.

**TOADS**  
Look out for tadpoles in ponds and lakes! - toad tadpoles are much rounder and darker than frog tadpoles.

**SWIFTS**  
Swifts are ready to leave and migrate back to Africa - look and listen out for them in screaming parties as they get ready for the long journey!

**HEDGEROWS**  
Are full of berries and nuts. Have a look and record what you see!

**TOADS**  
Winter is the perfect time to make a pond for toads and other wildlife.

**HEDGEROWS**  
Bright berries are great food for birds and other wildlife through the winter. Look out for blackbirds getting their fill.

**PAINTED LADY BUTTERFLIES**  
Migrate back to North Africa! Late-flowering plants give them food for the journey.

**BARBERRY**  
Look out for berries on barberry bushes - they're great food for birds.

**WILD FLOWERS**  
Leave areas of grass to grow! See what wildflowers appear.

**BATS**  
Looking for somewhere to hibernate. Why not borrow a bat detector!

**HEDGEROWS**  
Make cosy places for wildlife to keep warm on chilly days. Plant some Barberry to fill in any gaps.

**BIRDS**  
Put up bird boxes to make sure our feathered friends find somewhere safe to nest.

**HEDGEROWS**  
Perfect place for small birds to nest. Make bird nest balls full of wool and other cozy things for them to use too.

**SWIFTS**  
Look out for swifts starting to arrive in Britain! - they have travelled all the way from Africa.

**BARBERRY**  
Look out for yellow flowers on barberry bushes which are great sources of food for bumblebees and other insects.

**WILD FLOWERS**  
Sow seeds now to make sure bees, butterflies and other insects have plenty of food.

**SLOW WORMS**  
Look out for them hiding under old carpet or wood.
