

SUSTAINABLE PALM OIL CHALLENGE

WE WANT TO MAKE SUSTAINABLE PALM OIL THE NORM.
AND TO DO THIS WE NEED YOUR HELP!

There have been huge increases in the demand for certified sustainable palm oil but we could ALL be doing more to promote the use of sustainable palm oil.

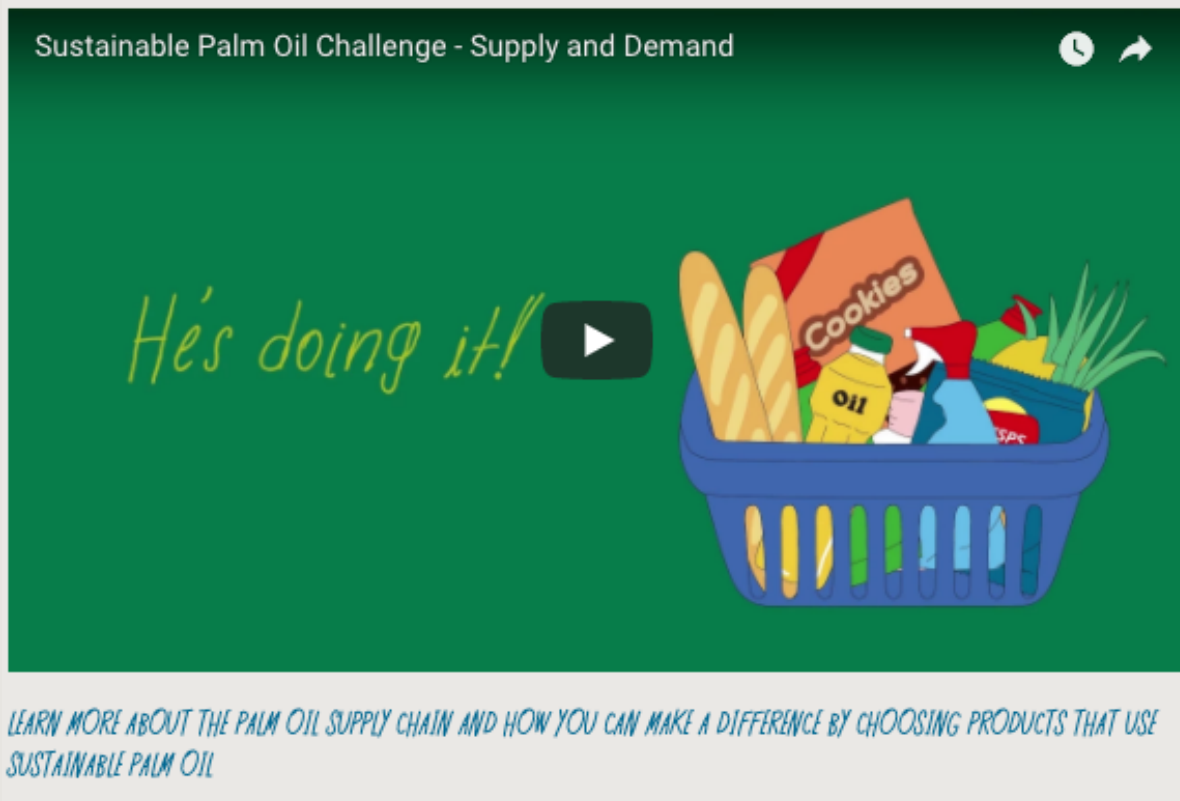

Through the relationships we have with our partners in Malaysia, Indonesia and around the world, we know about the devastating impact of unsustainable palm oil on wildlife.

We won't stand back. We think that we know the answer to protecting species affected by the palm oil issue.

That's why we've launched the Sustainable Palm Oil Challenge – a way of celebrating the companies who are already committed to sustainable palm oil, supporting those that want to become sustainable and making it easier for us all to pick sustainable products when we're doing our shopping.

We need your help to make sustainable palm oil the norm.
